Representative Address

Return Address

Dear _____,

I am writing this letter as a member of the New England chapter of The Methodist Federation for Social Action to encourage you to do all you can at the state level to lower emissions and stem the tide of the effects of global climate change. This administration has pulled our country from the 2015 Paris Climate Accord, and refuses to admit that global climate change is real and places the citizens of the world in real danger.

Though this action cannot be undone at the federal level, we encourage you to do all that you can on the state level to lower carbon emissions and invest in clean energy infrastructure.

We only have one good Earth. Please do your part to ensure that the air, water, and soil that we have taken for granted will be available to future generations.

Signed,

_____ and the New England MFSFA
